

GET THE VITAL STATS YOU NEED IN ONE INTUITIVE INTERFACE

View real-time critical equipment data with Site Sentry™ — now available to DC Group customers.

Standing guard 24/7, Site Sentry™ displays crucial information about your UPS unit(s) in a single intuitive interface. Like a life-support system for your equipment, it organizes data into a user-friendly format and sends immediate alarms any time there's an issue.

View everything from load status to input and output voltages to temperature and remaining battery capacity. Site Sentry™ delivers unmatched insight into performance and immediate notifications for the fastest possible return to uptime.

Your data is completely secured, encrypted and authenticated. Proxy software ensures devices aren't exposed to the internet. Site Sentry™ is the only software of its kind with this level of security.

See it at a glance. Get real-time data on:

- Load protected status
- Percent load on UPS
- Loads balanced
- Inverter component failures
- Battery failures
- Battery capacity
- UPS temp alarm
- Input and output voltages
- Alarm response status updates and progress comments
- Other custom diagnostics results and alarms

Find out more about Site Sentry™ and the PowerTools Suite™ of software solutions.
